School Learning and Teaching Plan
The current School Learning and Teaching Plan is built on the following goals:
1. To improve the first year experience for students
2. To continually review the content of courses to reflect developments in the discipline.
3. To continually review our programs to respond to needs expressed by students and potential employers.

In relation to goal 1, the School continues the development and improvement of its two programs PASS and PITSTOP.

The former is a program of peer support and mentoring provided by selected senior students to first year students.

The latter is the School's provision of a “drop-in” tutorial centre where students may receive assistance and advice on selected first year courses, outside of scheduled lecture, tutorial and consultation hours.

As examples of the School’s efforts in relation to goal 2, the School has recently conducted major reviews of the content of several courses (ECON1202, ECON1203, ECON 2217, ECON3110, ECON5201, ECON5203). These reviews are in response to comments by students, by our staff, and by other schools in FCE.

In relation to Goal 3, the School this year commenced the provision of its M.Ec program.

This program was developed after consultation with representatives from such institutions as Commonwealth Treasury, NSW State Treasury and the Reserve Bank.
