CATEI School Reports for the Faculty of Commerce and Economics

Information Systems Technology and Management

The CATEI process has been fully implemented in the school. Session 2, 2005 (see Attachment 1), Results highlighted that SISTM has performed to a very high teaching standard in spite of the high levels of disruption and anxiety that were caused by the restructure of the School (including the loss of 8 staff members). Those courses that were not affected by staff retrenchments (19 out of 23) had a mean score for Question 10 of 3 and the mean percentage of students satisfied was 86. This was an exceptional result which was achieved in spite of difficult circumstances.
