

<b>FACULTY OF COMMERCE AND ECONOMICS</b> <b>School of Information Systems, Technology and Management</b>	 <b>THE UNIVERSITY OF NEW SOUTH WALES</b> SYDNEY • AUSTRALIA
<b>INFS2603 Systems Analysis &amp; Design</b> <b>Course Outline, Session 2, 2004</b>	

---

## 1. Introduction

---

### 1.1. Role and Relevance of the Course

Whenever a business information system is developed, selected, purchased or implemented, a Systems Analysis and Design (S A & D) effort is usually undertaken. This could be a small task or a large-scale project. As such, this course will provide a foundation that will be built upon by other courses offered by the School.

This foundation course also provides the student with concepts and skills that will be essential in careers such as business systems consultants, system designers, system developers, computer programmers, systems engineers and systems analysts.

### 1.2. Aims of the Course

The aims of the course include:

- Provide a context or background for the S A & D activity;
- Introduce general systems analysis concepts & principles;
- Acquire skills in *Object-Oriented (O-O)* and *Structured S A & D*;
- Obtain experience in small self-directed work groups applying interpersonal communications, project management and quality assurance skills.

### 1.3. Learning Outcomes

At the conclusion of the course you should:

- Understand the business context of S A & D projects.
- Understand the concepts, principles and terminology of the O-O paradigm.
- Understand a typical Systems Development Life Cycle (SDLC) and explain the different characteristics of O-O SDLC and structured SDLC.
- Understand the concepts, principles and terminology of the structured S A & D paradigm.
- Be able to perform a structured systems analysis & design activity on a small-scale system.
- Understand some of the issues, benefits and disadvantages of working in small groups.
- Demonstrate an ability to synthesise ambiguous and incomplete information, and arrive at a decision by applying judgement and commonsense.

## 2. Course Schedule

Wk	Lecture	Class Activity	Readings	Due in Class
1	Introduction to Course <ul style="list-style-type: none"> <li>SA&amp;D Context &amp; Principles</li> <li>System Development Lifecycles</li> </ul>		Bennett Ch2, Ch3	
2	Introduction to I.S. Modelling <ul style="list-style-type: none"> <li>I.S. Modelling</li> <li>Fundamental O-O concepts</li> </ul>	System Responsibilities (SR)	Bennett Ch4, Ch5	
<b>Object-Oriented Systems Analysis &amp; Design</b>				
3	User's View <ul style="list-style-type: none"> <li>Use case diagrams</li> <li>Flow of events and scenarios</li> </ul>	Review Mini-Case	Bennett Ch6	Group Registration Form
4	Structural View <ul style="list-style-type: none"> <li>Objects, classes</li> <li>Initial CRCs</li> </ul>	Use Case (UC)	Bennett Ch7, Ch10	Hand-in (SR)
5	Behavioural View: Object Interaction <ul style="list-style-type: none"> <li>Sequence diagrams</li> <li>Statechart diagram</li> </ul>	Class Diagram (CD)	Bennett Ch9, Ch11	Hand-in (UC)
6	O-O Design <ul style="list-style-type: none"> <li>System, Object &amp; H-CI design</li> <li>Design Patterns</li> </ul>	Sequence Diagram (SD)	Bennett Ch12 - Ch15	Hand-in (CD)
7	Revision of Object-Oriented Systems Analysis & Design	O-O Development Overall Approach		Hand-in (SD)
<b>Structured Systems Analysis &amp; Design</b>				
8	Process Modelling <ul style="list-style-type: none"> <li>Event Decomposition</li> <li>Process Modelling (DFDs)</li> </ul>	Even Decomposition Diagram (EDD) Context diagram	Kendall & Kendall K&K Ch9	Assignment 1
9	Process Specification <ul style="list-style-type: none"> <li>Decision Tree/Table</li> <li>Structured English, Pseudocode</li> </ul>	Process Specification		Hand-in (EDD)
<b>Session Recess</b>				
10	Project Dictionary <ul style="list-style-type: none"> <li>Dictionary Entries</li> <li>Combining Data &amp; Process</li> </ul>	System Level DFD (Level 1 DFD)	K&K Ch10 K&K Ch11	Hand-in (Level 1 DFD)
11	Structured Systems Design <ul style="list-style-type: none"> <li>Program module design</li> <li>Forms/Screen/Report Design</li> </ul>	Data Dictionary		
<b>Systems Analysis &amp; Design Techniques</b>				
12	Foundation S A & D Techniques	Assignment Group Meeting		Assignment 2
13	Beyond S A & D <ul style="list-style-type: none"> <li>Implementation</li> <li>Support and Maintenance</li> </ul>	System Design		
14	Review of the Course <ul style="list-style-type: none"> <li>Examination preparation</li> <li>Course evaluations</li> </ul>	Administrative Issues Course Wrap-Up		

---

## 3. Student Assessment

---

Course Component	Assessment Element	Percent
Course Assessment	Assignment 1 (Group)	20
	Assignment 2 (Individual)	10
	Class Participation	10
Final Examination	Final Examination	60
	Total	100%

Notes: See the Course Schedule for Due Dates. Each component of the course may be scaled.

### 3.1. Criteria to Pass this Course

To receive a pass grade in this course, you must meet ALL of the following criteria:

- Attain an overall mark of at least 50%.
- Attend at least 80% of all scheduled classes.
- Attain a satisfactory performance in each component of the course. A mark of 45 percent or higher is normally be regarded as satisfactory.
- Attain a mark of at least 45% in the final exam

### 3.2. Assignments

Both assignments are based on a mini-case discussion of a business problem. This requires students to analyse the business problem and design a solution.

Assignment 1 will require the application of object-oriented concepts and the Unified Modelling Language (UML). Assignment 2 will require the application of traditional (structured) systems analysis & design techniques to be applied to the same problem. The following considerations apply:

1. Students work in groups of from the same class (no exceptions).
2. Submission procedures are covered in section 4.2 of this outline. Failure to comply will attract a penalty.
3. Students that commit to a group and then do not honour their commitments will lose marks. Group members are expected to work in a harmonious and professional fashion. This includes adequate management of non-performing members and conflict management. A group leader can be selected to help organise group activities.
4. You are to report any problems to the lecturer-in-charge as early as possible. Confidential peer assessments may be used for group assignments if individual contributions vary. The Lecturer-in-Charge will have the final discretionary authority to alter individual marks, based on information provided in the peer assessments and/or direct consultation with involved parties.

### 3.3. Class Participation

The class participation mark shall reflect your level of engagement with the class work. It is a discretionary mark determined solely by your lecturer or tutor. When determining the participation mark, your attendance, your contribution to class discussion and whether (or not) you have submitted the hand-ins as required will be examined. If you attend and hand-in regularly you should expect to obtain a participation mark of 7 out of 10.

### **3.4. Examination**

A formal closed book examination is conducted during the examination period. You must plan on being available for the full examination period to attend the final exam. In addition, you should also ensure that you will be available for a supplementary examination in the event of illness or misadventure. All material covered in lectures, tutorials, and readings are examinable.

---

## **4. Student Responsibilities**

---

### **4.1. Class Attendance**

You are required to attend at least 80% of classes. *Students failing to satisfactorily attend class will be given additional work.* A withheld grade will be assigned until the additional work is completed to the satisfaction of the Lecturer-In-Charge. In the event of illness or misadventure, you must provide your lecturer with documentary evidence.

### **4.2. Assignment Submission**

It is your responsibility to adhere to the procedures for submission of assignments otherwise a penalty may apply. The key requirements are:

1. Assignments shall be lodged in class during the week that they are due as indicated in the course schedule. If you have a separate tutorial and lecture, the assignment shall be lodged in your tutorial class.
2. Late submission of assignments and class work will incur a penalty of 10 percent of the maximum available mark per day including weekends and public holidays. For example, an assignment worth 20% will always attract a 2-mark penalty per day. An extension in the time of submission will only be granted under exceptional circumstances by the lecturer-in-charge. In all cases documented evidence must be provided to support such an application.
3. Part submissions will not be accepted.

### **4.3. Academic Misconduct**

You are reminded that the University regards academic misconduct as a very serious matter. Because of the circumstances in individual cases the period of exclusion can range from one session to permanent exclusion from the University. The following are some of the actions, which have resulted in students being found guilty of academic misconduct:

1. Taking unauthorised materials into an examination;
2. Submitting work for assessment knowing it to be the work of another person;
3. Improperly obtaining prior an examination paper and using it in the examination.
4. Failing to acknowledge the source of material in an assignment is known as plagiarism. Plagiarism entails taking and using as one's own, the thoughts or writings of another without acknowledgement including:
  - a. Where paragraphs, sentences, a single sentence or significant part of a sentence which are copied directly, are not enclosed in quotation marks and appropriately footnoted;
  - b. Where direct quotations are not used, but ideas or arguments are paraphrased or summarised, and the source of the material is not acknowledged either by footnoting or other reference within the text of the paper; and

- c. Where an idea, which appears elsewhere in print, film or electronic medium, is used or developed without reference being made to the author or the source.

The full plagiarism policy is available at the faculty website on the following link:  
[http://www.fce.unsw.edu.au/current\\_students/responsibilities.shtml#misconduct](http://www.fce.unsw.edu.au/current_students/responsibilities.shtml#misconduct).

#### **4.4. Responsibility to Keep Informed**

It is your responsibility to keep informed on breaking news regarding the course. Typically, this information is published on the course website. Occasionally, correspondence of an individual nature is required and e-mail may be sent to your official UNSW e-mail account. For more details refer to the "Course Website".

You should also be familiar with the specific policies of the school found on the school website. This is particularly important for students seeking post examination consultations with staff or applications for special consideration.

#### **4.5. Expected Workload**

Students are expected to invest approximately 8-10 hours per week in the following activities:

- Attend class..... 3 hrs per week
- Examination preparation & reading..... 2 hrs per week
- Group meetings in addition to class..... 2 hrs per week
- Contribution to assignments ..... 2 hrs per week

---

## **5. Student Support**

---

### **5.1. Course Website**

WebCT teaching environment will be used for this course. You need to be correctly enrolled and have an active Unipass to access the website. The URL address is <http://www.webct.unsw.edu.au>. The website will be used to publish announcements, lecture notes, conduct quizzes and a discussion forum. Students are expected to visit the course website at least weekly to obtain breaking news.

### **5.2. Educational Development Unit**

Additional learning support, tailored to the needs of FCE students, is available from the Education Development Unit (EDU) in the Faculty. The EDU offers a range of services for FCE students including:

- Academic skills workshops run throughout the session;
- Printed and on-line study skills resources e.g. referencing guide, report writing and exam preparation;
- A drop-in resource centre containing books and audio visual material that can be borrowed;
- A limited consultation service for students with individual or small group learning needs.

More information about the EDU services including on-line resources, workshop details and consultation request forms are available from the EDU website. EDU services are free and confidential and are available to students of the Faculty of Commerce and Economics. EDU contacts and location are:

EDU Web: <http://education.fce.unsw.edu.au>

EDU Location: Room 2039, Level 2 Quadrangle Building

### 5.3. Other UNSW support

In addition to the EDU services, the UNSW Learning Centre provides academic skills support services for students. The Learning Centre is located on Level 2 of the Library and can be contacted by Phone: 9385 3890 or through their website: <http://www.lc.unsw.edu.au/>. Students experiencing problems of an academic or personal nature are encouraged to contact the Counselling Service at UNSW. This service is free and confidential and run by professional counsellors. The Counselling Service is located on Level 2, Quadrangle East Wing, and can be contact on 9385 5418.

---

## 6. Course Staff

---

Title	Name	Room	E-Mail	Telephone
Lecturer In Charge	David Walker	Quadrangle Building, Room 2065	<a href="mailto:david.walker@unsw.edu.au">david.walker@unsw.edu.au</a>	(02) 9385 6434

Please refer to the course website for staff consultation times. When assistance is required, please use the existing avenues for support. These are:

1. YOUR Tutor during tutorials or their scheduled consultation time.
2. University e-mail or telephone should be used only for urgent matters, as there is considerable opportunity for face-to-face communication.
3. As a security measure, your tutor or lecturer may not receive e-mails from anonymous accounts such as yahoo or hotmail. For this reason you should always use your official UNSW student account or your work e-mail. Also, e-mail correspondence should include your student number and your group number.

---

## 7. Resources

---

### 7.1. Texts

Bennett, S.; McRobb, S.; and Farmer, R. 2002, *Object-Oriented Systems Analysis and Design using UML*, 2<sup>nd</sup> Edition, McGraw Hill. ISBN 0-07-709864-1

Kendall, K.E. and Kendall, J.E. 2002, *Systems Analysis & Design (Custom Book)*, pp241-280, 5<sup>th</sup> Edition, Prentice-Hall. ISBN 1-74009-412-3

(This is a special publication available from the UNSW bookshop comprising of chapters 9, 10 and 11 of the original book. There is no need to purchase the complete original book.)

### 7.2. Useful References

UNSW Faculty of Commerce & Economics, *2003 Student IT Resource Handbook*. Available from Lab supervisors.

Booch, G., Rumbaugh, J., and Jacobson, I. 1999, *The Unified Modelling Language Users Guide*, Addison Wesley.

SiAlhir, S. 1998, *UML in a Nutshell*, O'Reilly & Associates.
